📅 31 Years old 📞 (15) 99117-2568 📍 Tatuí - SP 🇧🇷 Brazil

📄 SUMMARY

I am a dedicated Site Reliability Engineer and DevOps professional with over ten years of experience, focusing on automation, FinOps, and AI integration in high-stakes production environments, particularly within the financial sector. My expertise includes AWS, Kubernetes, Terraform, and CI/CD pipelines. I have a proven track record of leadership and problem-solving in complex scenarios. I hold an MBA in IT Management and am AWS certified. Fluent in English, I am committed to enhancing operational efficiency and reliability in my current and future roles.

🧰 EXPERIENCES

🔗 Site Reliability Engineer

11/2024 - Current

Swap

I migrated the observability stack to Infrastructure as Code (IaC), including datasets, monitors, and alerts in Observelnc. I implemented a standardized CI/CD pipeline using GitLab, ArgoCD, and Helm, enhancing it with Static Application Security Testing (SAST) and multi-architecture support. I also migrated applications and upgraded clusters in AWS EKS. Throughout my tenure, I maintained the infrastructure and provided daily operational support, ensuring smooth and efficient system performance.

🔗 Site Reliability Engineer

10/2021 - 10/2024

PagSeguro PagBank

During my time at PagSeguro, I focused on ensuring the availability, latency, performance, and efficiency of critical services. I automated data ingestion and processing tasks using AWS, leveraging Python, Shell, PowerShell, and Batch scripting. I utilized monitoring tools such as New Relic, Grafana, Zabbix, and Prometheus to keep environments stable. I managed FinOps and capacity planning while supporting engineering teams. I applied SRE practices with a strong emphasis on SLA, SLI, and SLO, fostering a DevOps culture. Additionally, I maintained CI/CD pipelines using Jenkins, Groovy, SQS, and Kafka.

💡 GENERAL EXPERIENCE

Master/Expert ★★★★★

🎯 OBJECTIVES

Pursuing SRE roles focused on automation.

⚡ SKILLS

MASTER ★★★★★

AWS, CI/CD, Kubernetes, Terraform and Automation.

SENIOR ★★★

ALB, Amazon S3, ArgoCD, Auto Scaling, Batch, CloudFront, EKS, ELB, GitLab, Glacier, Grafana, Groovy, Helm, IAM, Jenkins, Kafka, New Relic, PowerShell, Prometheus, Python, Route53, Shell, SQS, SSL, VPC, WAF, Zabbix, FinOps, Leadership and Problem Solving.

 IT Consultant

06/2020 - 10/2021

Horizon IT Cloud

At Horizon IT Cloud, I provided expert consulting services for cloud migration and managed operations in cloud-native environments. I spearheaded web hosting projects utilizing CloudFront, S3, and SSL, and ensured data security with backups on Glacier. My responsibilities included configuring Auto Scaling, ELB/ALB, VPC, IAM, WAF, and Route53. I played a key role in supporting clients' transitions from traditional IT infrastructures to cloud-based solutions, optimizing their technology stack for improved performance and scalability.

 System Administrator

01/2020 - 12/2020

BR Consultoria

During my tenure at BR Consultoria, I managed and maintained the company's IT infrastructure. I was responsible for configuring and troubleshooting servers, networks, and security systems to ensure optimal performance and security. I implemented backup and recovery solutions to safeguard data integrity and collaborated with the IT team to streamline operations. My role also included monitoring system performance and providing technical support to users, enhancing their productivity and resolving technical issues efficiently.

 Founder

01/2017 - 12/2019

TryCloudOps

As the Founder of TryCloudOps, I led the establishment and growth of the company, focusing on delivering cloud operations solutions. I was responsible for defining strategic direction, managing client relationships, and overseeing project execution. I implemented cloud infrastructure solutions and fostered a culture of innovation within the team. My role also included ensuring the scalability and reliability of services, driving business development, and maintaining operational excellence.

 IT Analyst

09/2016 - 12/2016

AT Soluções

In my role as an IT Analyst at AT Soluções, I was responsible for analyzing and improving the company's IT systems and processes. I collaborated with various teams to identify system requirements and implemented solutions to enhance efficiency. My duties included troubleshooting technical issues, maintaining system performance, and providing support to users. I also contributed to the development of IT policies and procedures, ensuring that operations aligned with business goals and industry standards.

 IT Technician

05/2014 - 08/2016

Multimicro Computadores

During my time at Multimicro, I was responsible for maintaining and troubleshooting computer systems and networks. I installed and configured hardware and software, ensuring all systems operated efficiently. I provided technical support to users, resolving issues promptly to minimize downtime. My role also involved performing regular system updates and backups to safe-

guard data integrity. Additionally, I collaborated with team members to optimize IT processes and enhance overall system performance.

.NET Developer

04/2013 - 04/2014

LCS Locação Máquinas

At LCS Locação Máquinas, I developed and maintained software applications using .NET technologies. I collaborated with cross-functional teams to design and implement user-friendly interfaces, ensuring seamless integration with existing systems. My role involved debugging and troubleshooting code to enhance performance and reliability. I also participated in code reviews and contributed to improving development practices, which helped in delivering high-quality software solutions.
