

John Pereira

PROFESSIONAL BACKGROUND

As a Full Stack Engineer, I have experience in designing and developing software using technologies such as Node.js, Typescript and React.js. I pride myself on being organized, detail-oriented, and a critical thinker. On a day-to-day basis, my work involves the ability to strategize and prioritize effectively to accomplish multiple tasks, while also staying calm under pressure. I am equipped with a diverse and promising skill set, and I am proficient across various platforms, languages, and frameworks. I can effectively self-manage during independent projects and collaborate as part of a productive team.

WORK EXPERIENCE

Full Stack Engineer | HeadRush | January 2024 - Present

- Successfully implemented new features and functionalities that have significantly improved the HeadRush app's performance and user engagement in Meteor and React ecosystems.
- Leveraged Bootstrap for responsive and user-friendly designs. Meticulous debugging and the resolution of complex issues, ensuring the application's reliability and robustness.
- Played a pivotal role in the development and enhancement of the HeadRush app.
- Contributed to the refactoring of the codebase, adopting the Atomic Design

methodology to promote modularity and reusability. This approach has streamlined our development processes and enhanced the maintainability of our code.

- Created a custom filter feature using OpenAI API.
- Improved and designed a testing system using Cypress and GitHub features to automate end-to-end testing.

Full Stack Engineer | Critical Links | October 2021 - January 2024

- Development of the frontend for the C3 Cloud Control v3 product, utilizing technologies such as React.js, TypeScript, and Material UI.
- Implementation of the Atomic Design methodology.
- Migration of the back-end of the Cloud Control product from Node.js to Nest.js
- Development of new functionalities in both back-end and front-end of C3 Microcloud using Nest.js, Typescript, MongoDB and React.js technologies.
- Design and implementation of Licenses Order Manager backend and frontend using Nest.js, Typescript, MongoDB and React.js.
- Design and implementation of the Licenses Manager product interface using React.js and Typescript.
- Implementation of new functionalities at the back-end of the Licenses Manager product using Nest.js and MongoDB.
- Participation in design reviews and brainstorming sessions to ensure adherence to Atomic Design principles and encourage innovation in design processes

Co-founder & Executive Director | UYRobot | September 2014 - October 2021

- Management of the startup
- Design, development and implementation of the Octy robot, using C to program the ATME161 328p microcontroller firmware.
- Development and implementation of Blocty an Octy control in JavaScript, HTML, CSS, google Blockly and Scratch libraries.

- Leader of the development team of UNVICTO 2030, android interface and general system in C++
- Design of courses related to the STEAM, robotics and programming areas.

Assistant of the Institute of Computing | UDELAR | February 2014 - February 2016

- Professor of the "Logic" and "Programming 1" courses of the Computer Engineering career at the Faculty of Engineering from Uruguay.

Assistant of the Institute of Computing | UDELAR | February 2013 - February 2014

- Collaboration in the development of new features for the Butiá robot in C/C++ and Python
- Conducted training sessions for teachers.

Junior Technical Assistant | Fundación J. Ricaldoni | September 2010 - December 2012

- Member of the research team in the MINA group (Network Management and Artificial Intelligence) at the Faculty of Engineering, University of the Republic. Participation in the development of the Butiá 2.0 robot (Butia SAM). Development of the USB4butia for the Butiá robot.
- Developed USB4Butiá design and firmware in C/C++
- Colaborated in the Trutrlbots programing software in Python.

Database Engineer Assistant | UTE | September 2010 - December 2012

- Management of the commercial sector database for the National Administration of Power Plants and Electrical Transmissions (UTE).

EDUCATION

- **Master of Business Administration** | ADEN University | 2023 - Ongoing
- **Bachelor's degree in Computer Engineering** | Universidad de la República (UDELAR) | 2008 - Incomplete

CERTIFICATIONS

- JavaScript | Udemy | 2021

PUBLICATIONS

USB4BUTIÁ: Educational Robotics Interface of simple manufacture and low cost | Argentina | February 2012

- Authors: Guillermo Riesch, John Pereira
- Event: "Congreso Argentino de Sistemas Embebidos Libro de Memorias Case 2012", page 282.
- ISBN - 978-987-9374-82-5

TEDx talk: "Robotics for education" | Uruguay | July 2016

- Presentation of the concept of educational robotics and an applied example with the Butiá robot.

CORE SKILLS

React.js, JavaScript, TypeScript, HTML, CSS, Nest.js, Python, C/C++, Node.js, GraphQL, Docker, Git, Linux, MongoDB, SQL, Figma, Atomic Design, Material UI, Reactstrap, RESTful, OpenAI API, Cypress, CI/CD, GitHub, Jira, Scrum, Agile methodologies, AWS, PostgreSQL, LLM.

LANGUAGES:

- English (90%)
- Portuguese (100%)
- Spanish (Native)
