

Kevin Aguilar

PROFESSIONAL BACKGROUND

Innovative and results-driven Front-End Developer and Software Architect with extensive experience building scalable, high-performance web and mobile applications. Specialized in Angular, React, React Native, and Node.js with a solid foundation in JavaScript, TypeScript, and cloud-based architectures.

Known for leading migrations, architecting reusable component libraries, and designing performant game engines. Passionate about crafting intuitive user experiences with a strong sense of visual design—fueled by a background in filmmaking and digital art. Thrives in agile, fast-paced environments and consistently stays ahead of trends in modern web development, software architecture, and cloud computing.

WORK EXPERIENCE

Senior Front-End Developer | Clicklease | November 2022 – September 2024

- Spearheaded the creation of a reusable Angular component library used across multiple applications.
- Led the migration to Angular 17 and implemented modern libraries like Angular Material and NGRX.
- Boosted performance by leveraging module federation for micro-frontend architecture.
- Collaborated with back-end teams to integrate Node.js APIs and improve service

communication.

- Promoted coding best practices around accessibility, performance, and responsive design.
- **Technologies:** Angular 17, Angular Material, NGRX, Node.js, Module Federation, HTML5, SCSS.

Code Architect | Konceptik Studio | May 2018 – September 2022

- Designed and led the architecture of custom game engines using JavaScript and Canvas APIs.
- Implemented real-time rendering systems with PIXI.js and WebGL for interactive experiences.
- Built scalable cloud-hosted services with AWS S3 for optimized delivery.
- Mentored junior developers in JavaScript, TypeScript, and front-end architecture.
- **Technologies:** PIXI.js, Node.js, Express.js, TypeScript, HTML5, CSS3, AWS (S3).

Front-End Developer | Interaction | September 2017 – April 2018

- Developed responsive marketing websites and temporary landing pages focused on UX and conversions.
- Used React.js, jQuery, and serverless architecture to deliver high-performance solutions.
- Integrated AWS-based backends using MySQL and MongoDB.
- **Technologies:** React.js, jQuery, Node.js, Express.js, MySQL, MongoDB, AWS (Serverless).

Front-End Developer | Infosgroup | May 2017 – September 2017

- Built Angular components for Procomer's logistics tracking platform.
- Visualized real-time order status updates using Angular and RxJS.
- Optimized asynchronous data handling with custom Angular services.
- **Technologies:** Angular, RxJS, HTML5, CSS3, Nginx.

PROJECTS

- **React Native Mobile Apps:** Developed cross-platform mobile apps with React Native for internal tools and client projects, focusing on native performance and UI consistency with shared business logic across platforms.
- **Technologies:** React Native, Expo, Redux, TypeScript.

EDUCATION

- **Bachelor's degree in Software Engineering** | Cenfotec University | 2017 – 2019
- **Technical degree in Web Design and Development** | Cenfotec University | 2017

CERTIFICATIONS

- Software Architecture & Design of Modern Systems | Udemy | 2024

CORE SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, HTML5, CSS3, React, React Native, Angular, Node.js, Express.js, jQuery.
- **Backend & Databases:** SQL, MySQL, MongoDB, GraphQL.
- **Cloud & DevOps:** AWS (S3, Lambda), Module Federation, Serverless Architecture.
- **Tools & Practices:** Git, Agile (Jira/Slack), REST APIs, Responsive Design, UI/UX, WebGL.
- **Other:** PIXI.js, RxJS, C#, Java.
