📅 38 Years old 📞 (11) 98875-7720 📍 São Caetano do Sul - SP 🇧🇷 Brazil

📄 SUMMARY

As a seasoned Cloud and DevOps Engineer with over 20 years in IT, I specialize in designing and managing mission-critical environments across AWS, GCP, and Azure. My expertise lies in cloud solutions and automation using tools like Terraform, GitLab CI, and ArgoCD. I have a proven track record of leading cloud migration projects and implementing scalable, cost-effective solutions. With a Bachelor's degree in Computer Science from USCS and fluency in English, I excel in collaborating with diverse teams. My skills in leadership, problem-solving, and communication further enhance my ability to drive technological advancements.

🧰 EXPERIENCES

🔗 Cloud Architect & DevOps

11/2021 - Current

Porto Seguro

I was responsible for designing, implementing, and providing ongoing support for mission-critical Linux server infrastructure in on-premises and cloud environments. From project conception, I collaborated with clients to understand and choose the most appropriate solutions tailored to their needs, overseeing delivery and support management. My work involved technologies like OpenStack, CloudStack, Mikrotik, PFSense, Endian Firewall, Netfilter, Zabbix, Nagios, Zimbra, Postfix, SpamAssassin, Asterisk, IDS Snort/Acid, Apache, Nginx, HAProxy, DNS, DHCP, FTP/S, SSH, CUPS, LDAP, SAMBA3/4, QoS, MySQL (Replication/Cluster HA), MongoDB, PostgreSQL, Mantis, Jenkins, OcsInventory, Squid, Sarg, Ocomon, Cacti, and Varnish.

🔗 CTO

11/2017 - 10/2021

4tinet

At 4tinet, I spearheaded the 'journey to the cloud' initiative, focusing on migrating local infrastructures to AWS, Azure, and GCP. My primary responsibility was to design and implement robust, highly available, and cost-effective solutions for SMEs. I developed IT processes and solutions centered around microservices using Docker, Kubernetes, and Rancher. Additionally, I led the technical support team, facilitating internal knowledge transfer, establishing technical processes, and setting documentation standards.

💡 GENERAL EXPERIENCE

Master/Expert ★★★★★

🎯 OBJECTIVES

Seeking roles in cloud engineering and DevOps.

⚡ SKILLS

MASTER ★★★★★

AWS, Azure, Cloud, DevOps, GCP, Linux, Terraform, Communication, Leadership, Problem Solving and Teamwork.

SENIOR ★★★

Apache, Apache Kafka, ArgoCD, CloudFront, CloudStack, CloudWatch, Docker, EC2, ECR, ECS, GitLab CI, IAM, Jenkins, Kubernetes, MongoDB, MySQL, Nginx, OpenStack, PostgreSQL, Python, Rancher, Redis, Route53, S3 and VPC.

EXPERIENCES

We also implemented a self-service platform for development teams using Backstage, enhancing agile application delivery in cloud and Kubernetes environments.

Senior Linux & Cloud Administrator

06/2015 - 10/2017

AW2Net

During my time at AW2Net, I played a pivotal role in transitioning AWS workloads to GCP, leveraging automation tools like GitLab CI, ArgoCD, and Terraform. I managed the cloud infrastructure, facilitating seamless integration between data centers and corporate clouds, and ensuring IoT systems were highly available and scalable. I collaborated closely with project and systems teams, acting as a bridge to enhance operations. Notable projects included work with ProIoT, Netshoes, Renner, Tramontina, and Joli, where I contributed to maintaining robust and efficient cloud environments.

IT Manager

08/2008 - 05/2015

Multiuser

In my role as an IT Manager at Multiuser, I was tasked with designing and implementing infrastructure architectures for remote connection projects using Microsoft Windows Server and the RDP protocol. My responsibilities included hardware sizing, selecting virtualization platforms, and setting up network infrastructures, including internet links and gateways. I implemented VDI solutions with Citrix HDX, VMware PCoIP, and Remote Desktop Services with RemoteFX. I worked on projects for notable clients such as Telefonica, Hyundai CAO, Petrobras, Nic.BR, Café Pelé, and Coop, ensuring robust and efficient remote connectivity solutions.

EDUCATION

USCS - Universidade Municipal de São Caetano do Sul

Bachelor of Science in Computer Science

MATCHING ROLES

Cloud Architect	95%
DevOps Engineer	90%
Cloud Engineer	85%
IT Manager	80%
Linux System Administrator	75%
